

For Immediate Release

OneReg to Showcase Revolutionary Aviation Compliance Platform at World Aviation Festival

Auckland, New Zealand

5 September 2025

OneReg is heading to World Aviation Festival in Lisbon, 7-9 October at FIL – Feira Internacional Lisboa (Stand 2-135)

The World Aviation Festival is a premier global aviation technology conference and exhibition, bringing together 4,500+ attendees and 600 speakers over three days of insights, innovation, and networking. This is where the future of aviation is shaped, and OneReg will be there shaping it.

Our vision is simple: reimagine compliance not as regulatory burden, but as an embedded part of everyday operations. With the only compliance platform purpose-built for aviation, OneReg enables aviation operators and regulators to work from a shared source of truth – compliance becomes a live, dynamic ecosystem where insights flow in real-time, decisions are driven by high-quality data, and safety is the natural outcome of smarter operations.

With OneReg, compliance isn't a check-box – it's a state of being that reduces time, complexity, and cost while improving visibility and assurance across the organisation.

OneReg Chief Operations Officer, Carly Waddleton will be at World Aviation Festival alongside UK Country Manager, Lisa Tomlins and Marketing Executive, Angel Matsis. Waddleton says "Aviation needs compliance systems that are as real-time and dynamic as the industry itself. OneReg is built for aviation – come see how clarity, context and compliance can scale with your operation"

Meet us at World Aviation Festival
7-9th October 2025 | Stand 2-135

See a live demo of a better way to manage:

- Safety Management (SMS)
- Aviation-first document control

About OneReg

Purpose-built for aviation, OneReg unifies compliance and operations on a single, integrated platform – connecting regulations, manuals, procedures and daily operations, giving real-time assurance, complete traceability, and a single, shared source of truth. The result: faster decisions, greater visibility of risk, and teams that stay audit-ready always. We support customers across the UK, EU, Australia and New Zealand.
